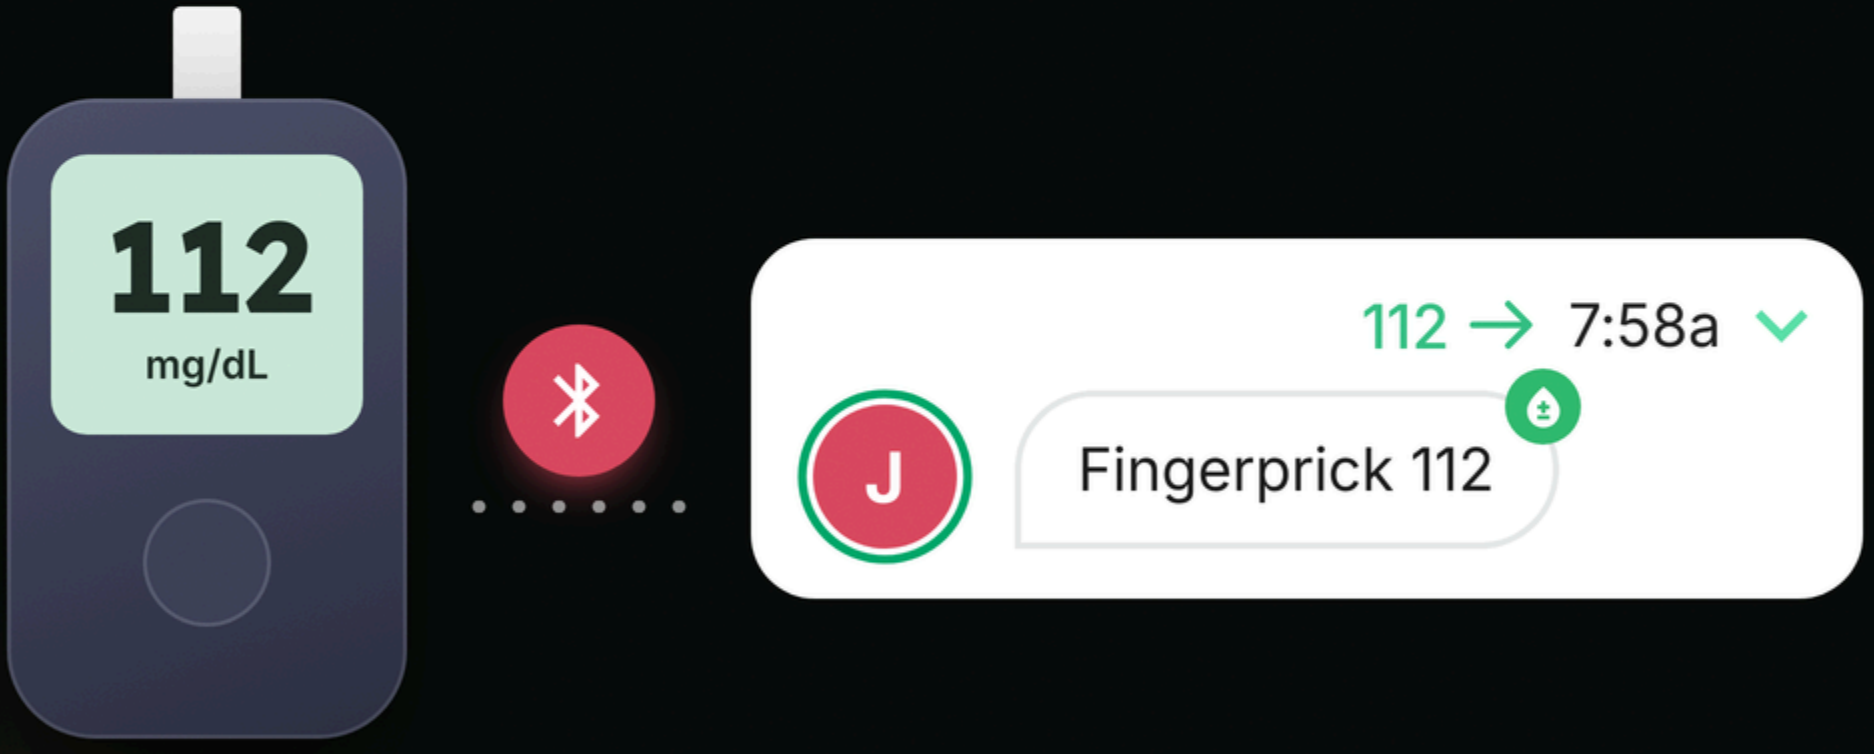
BG METERS

BG METERS

EXPERIMENTAL

Your meter syncs itself.

Turn on your paired Bluetooth BG meter after a check, and Gluroo logs the result, even when Gluroo is closed.



- Turn on Sync automatically
- Syncs when the meter turns on
- Even when Gluroo is closed
- Logged as a fingerprick

For paired Bluetooth BG meters. Android asks once to allow background sync. Example reading.

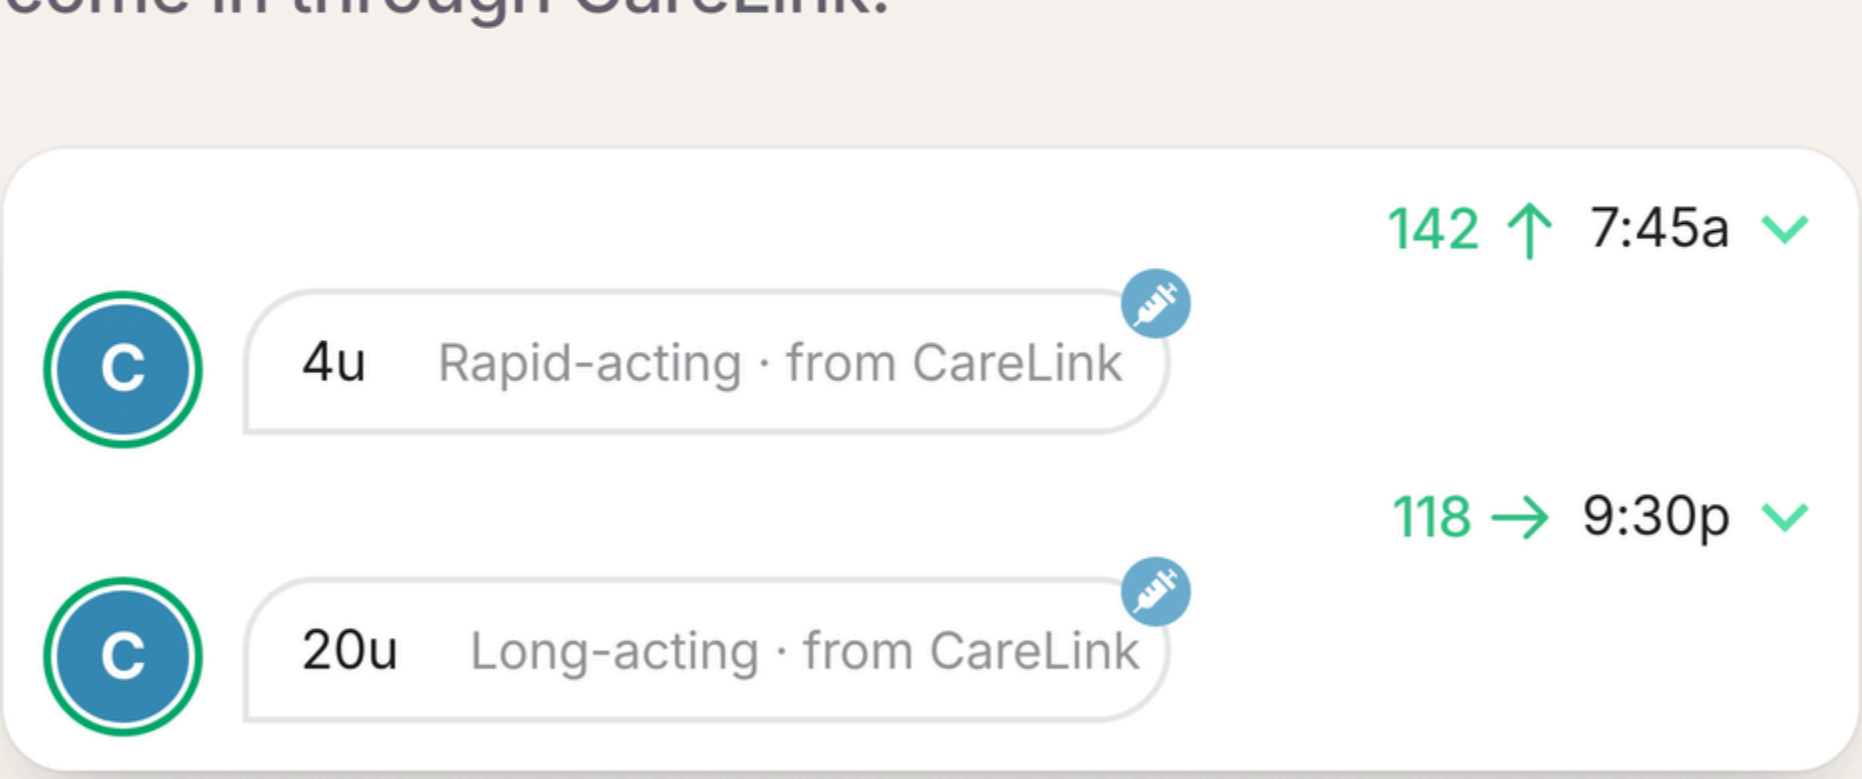
MINIMED CARELINK

MINIMED CARELINK

NEW

InPen doses, in Gluroo.

On a MiniMed Go or Simplera system without a pump, doses from your InPen and the MiniMed app now come in through CareLink.



- **Pen doses from your InPen**
- **Doses you enter in the MiniMed app**
- **Priming shots left out**
- **No doubles with doses you log**

For MiniMed Go or Simplera with CareLink and no pump. Example doses.
Not affiliated with Medtronic.

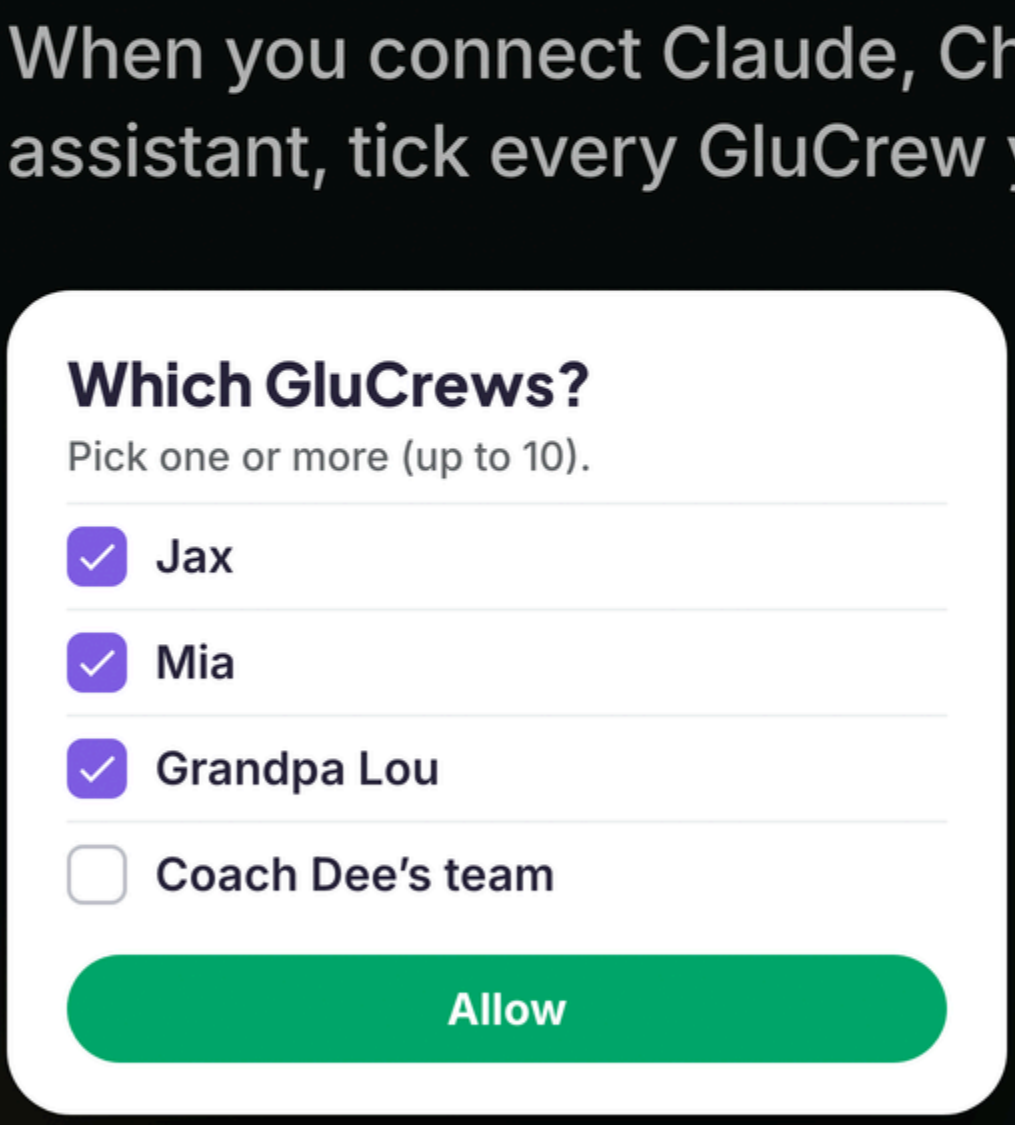
AI ASSISTANTS

IMPROVED

One connection, many GluCrews.

When you connect Claude, ChatGPT or another AI assistant, tick every GluCrew you want it to read.



- Pick up to 10 GluCrews
- Ask about any of them
- Read-only, as before
- Disconnect one at a time

Connect at app.gluroo.com/ai. Example names. Not affiliated with Anthropic or OpenAI.

WIDGETS AND WATCHES

IMPROVED

On board, always current.

Widgets, watches and the lock screen keep insulin and carbs on board up to date while Gluroo is in the background.

- With Direct Dexcom G7
- Pump doses show right away
- Winds down sensibly offline

Example numbers. Not affiliated with Apple, Google or Dexcom.
