SWIPE

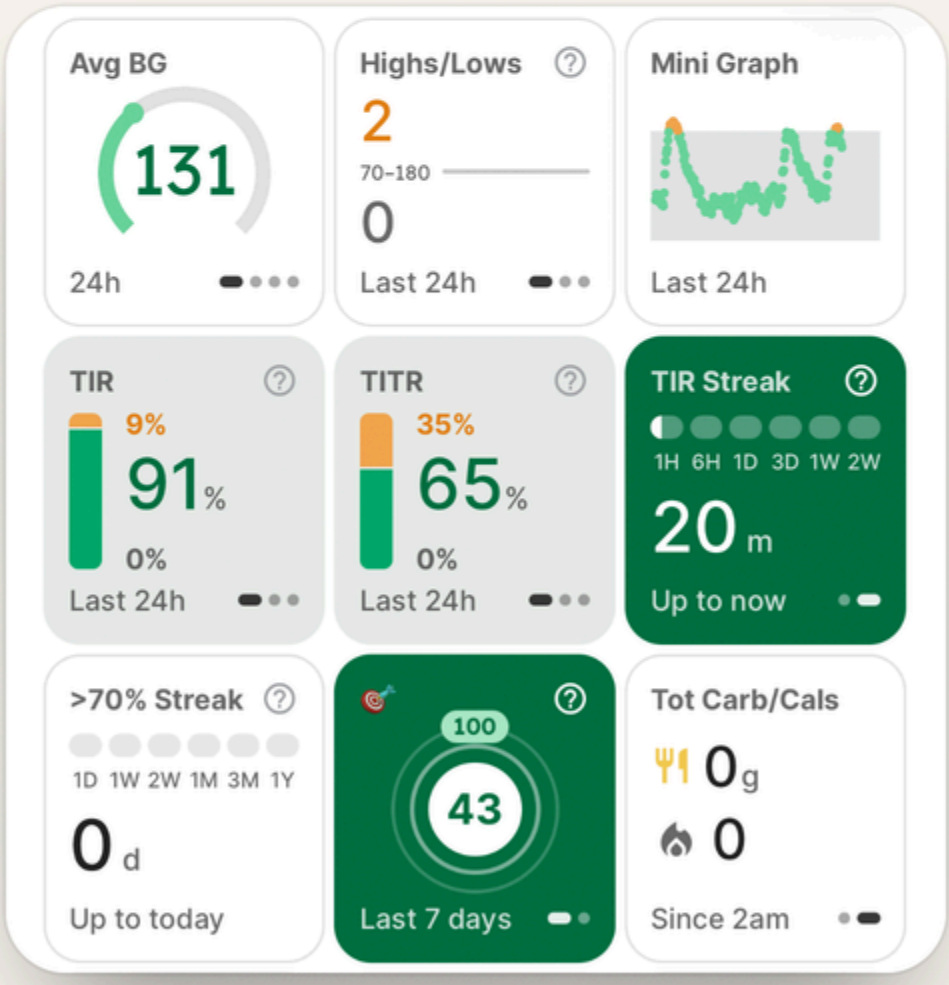

CHART STATS

IMPROVED

Your stats, at a glance.

The stat tiles on the Chart tab have a fresh, easier-to-read design.

- Three tiles to a row, easier to read
- Your average on a colored ring
- Time in range, highs on top, lows below
- Tap a tile to switch its time period

Example data. Screenshot from the Gluroo app on iPhone.

GLUROO ON THE WEB

GLUROO ON THE WEB

PREVIEW

Set up from your computer.

Create your account, connect your CGM and pump, and set up reminders at app.gluroo.com/start.

A preview: tell us what you think at help@gluroo.com. Gluroo is not affiliated with Dexcom.

SWIPE

APPLE WATCH

NEW

Look back on your watch.

Swipe the Gluroo chart on your Apple Watch to scroll back through the last 48 hours.

- Swipe back up to 48 hours
- Tap the top to jump to now
- Touch and hold to read a value
- Opens on the page you left

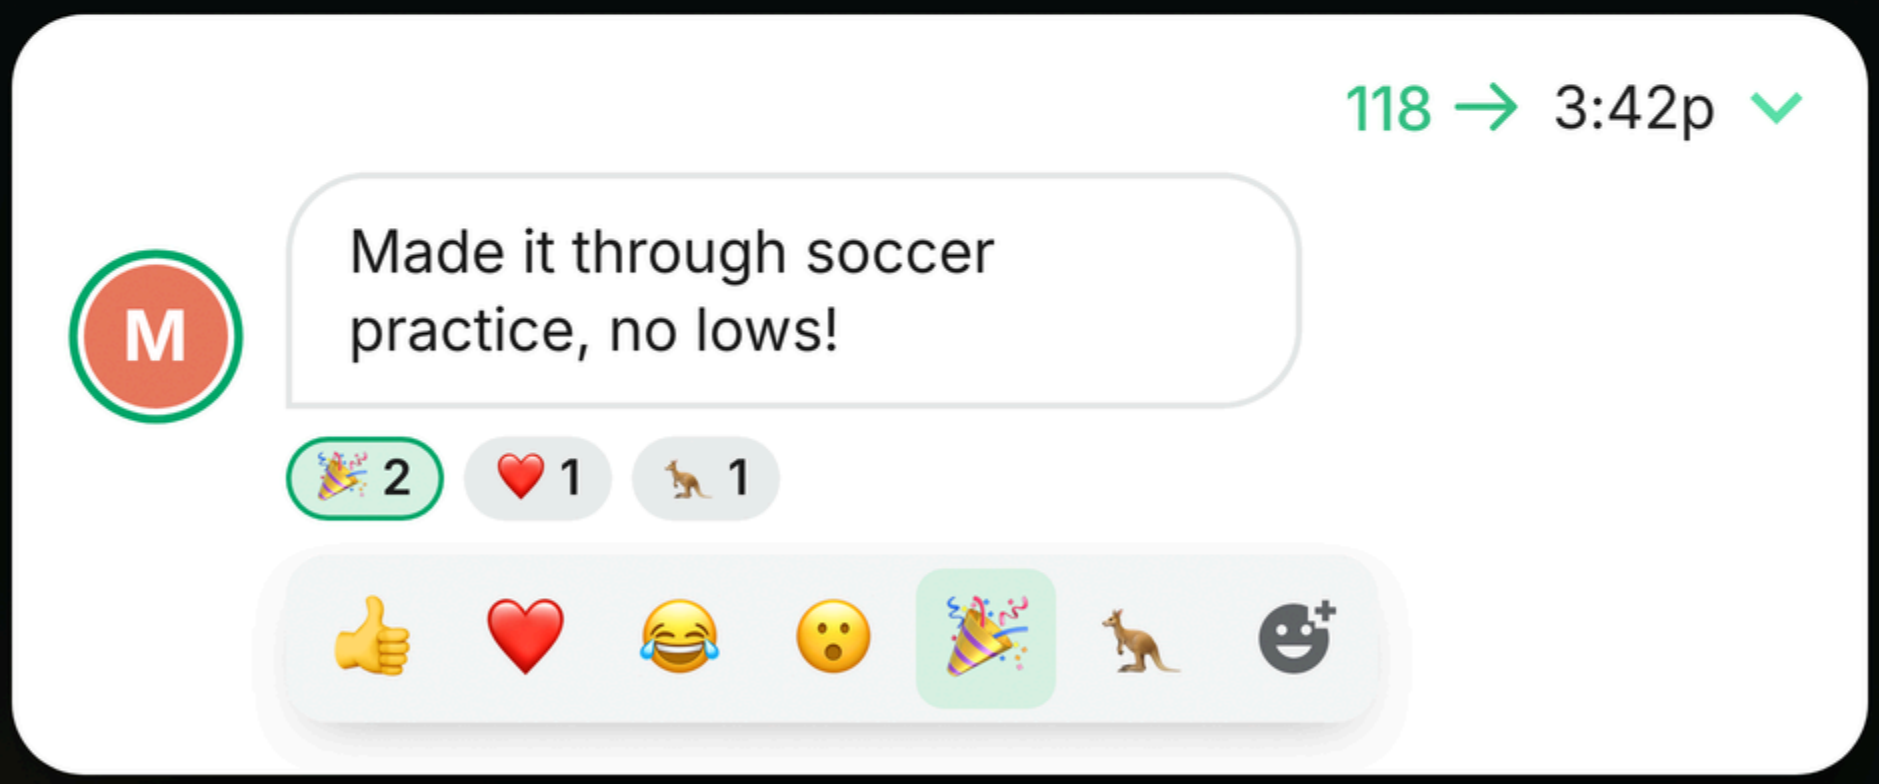

Readings are examples. Gluroo is not affiliated with Apple.

REACTIONS

NEW

React to any message.

Tap a message in the Log to send a thumbs up, a heart, a kangaroo, or any emoji.

- Tap a message, then a reaction
- Six quick picks, or any emoji
- Tap a reaction to see who and when
- A quiet notification, no badge

Example message.

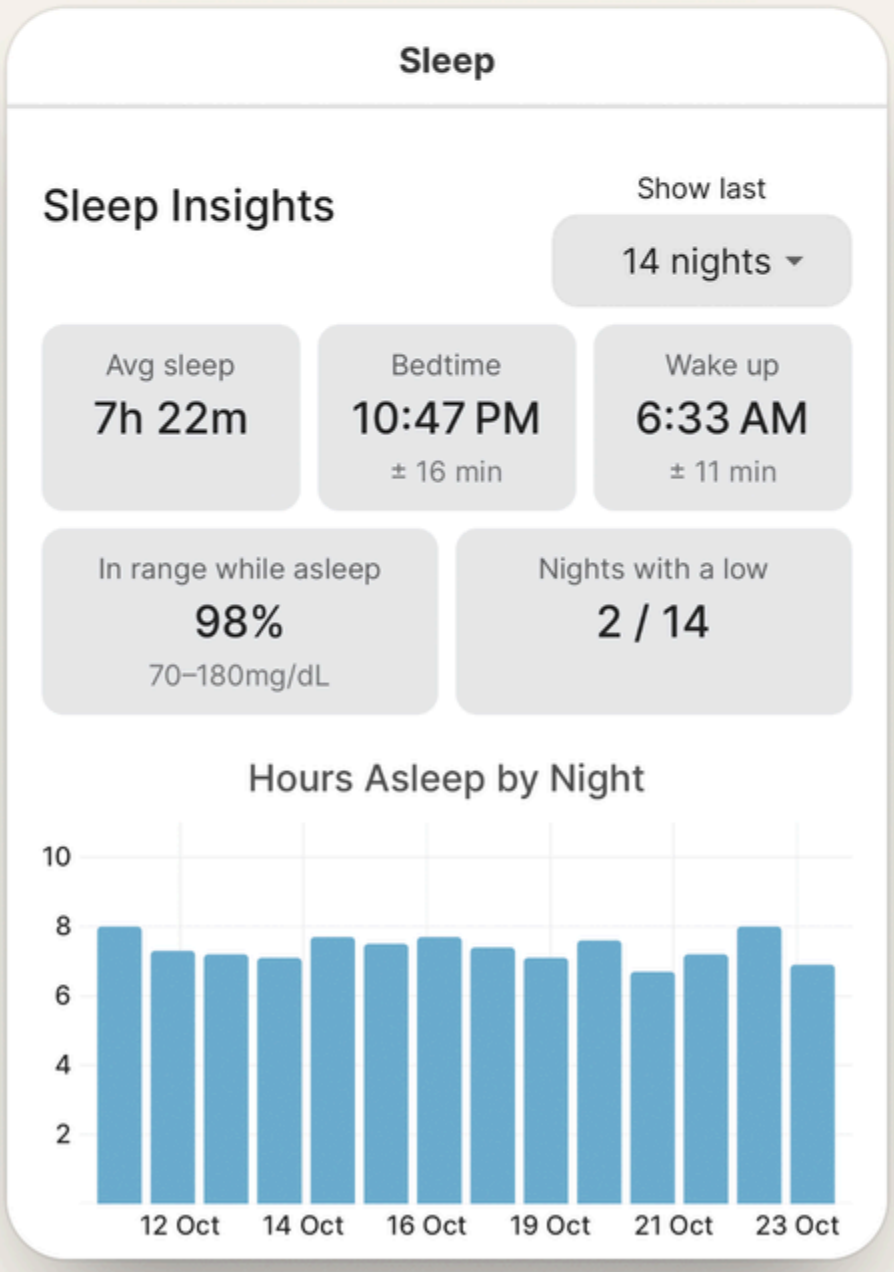

SLEEP

NEW

Your nights, with glucose.

Sleep from Apple Health or Health Connect, with how your glucose did overnight.

- From your watch, ring or sleep tracker
- Your usual bedtime and wake-up
- Your glucose for each night

Example data. Needs sleep from a watch, ring or other tracker. Gluroo is not affiliated with Apple or Google.

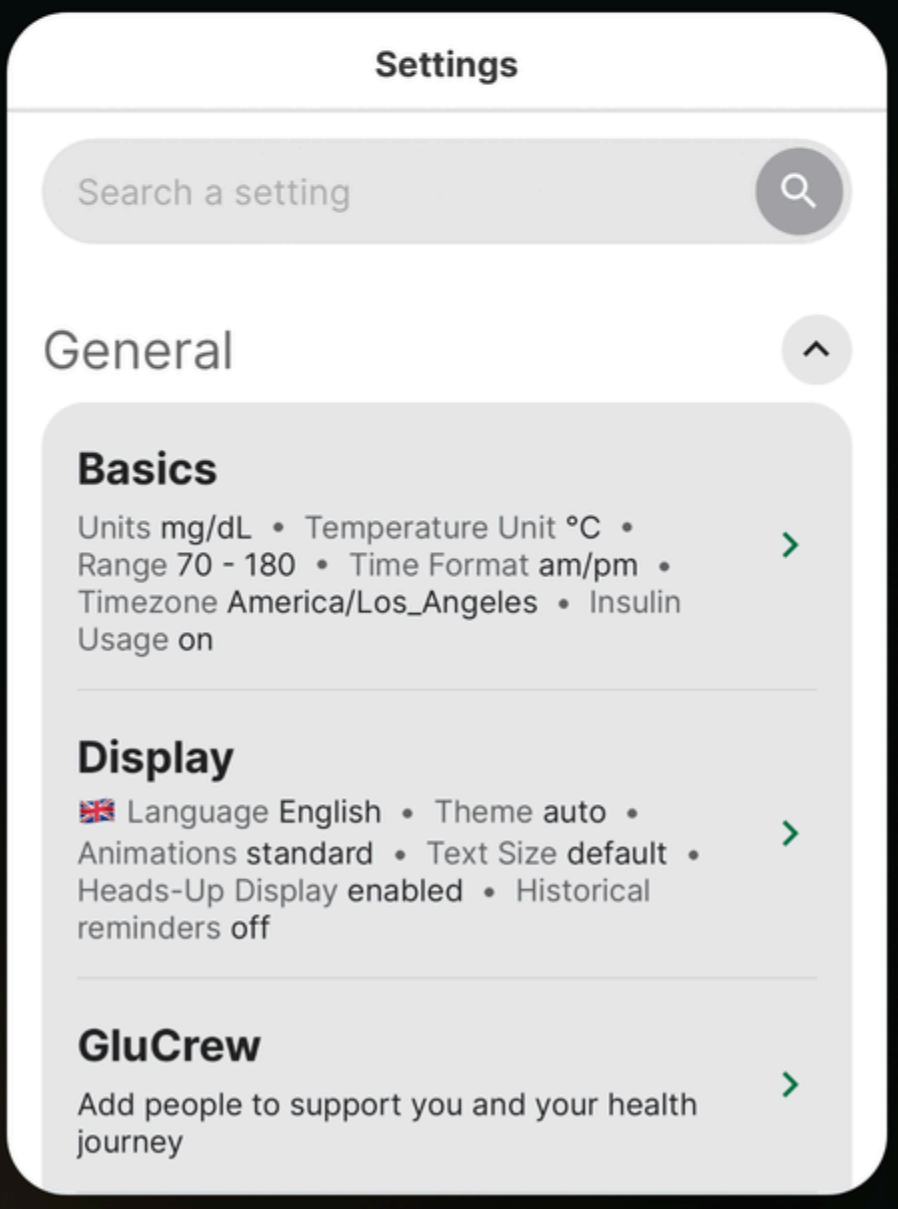

SWIPE

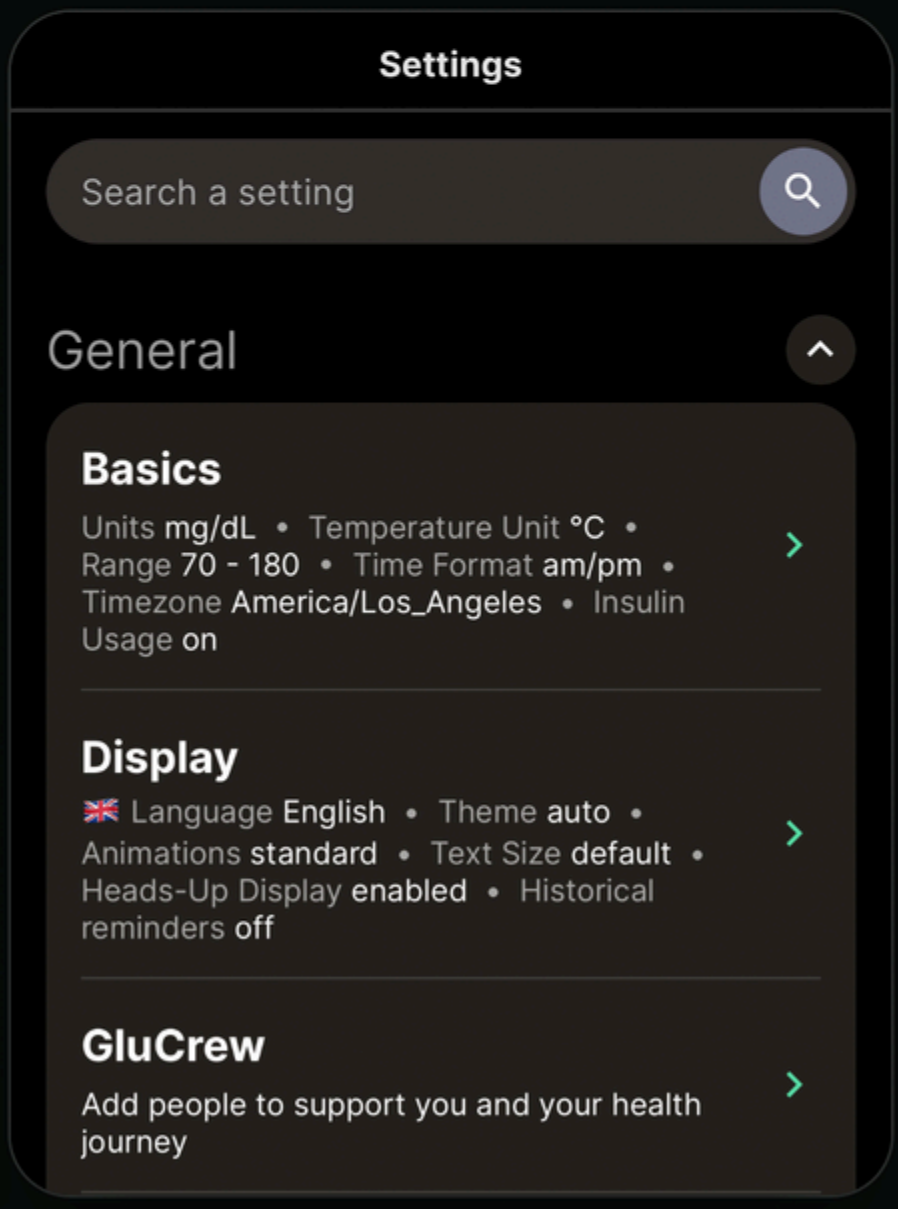

DESIGN

IMPROVED

A cleaner look.

Settings and Status, reorganized. A fresh tab bar, menus and search, in light and dark.

Screenshots from the Gluroo app.

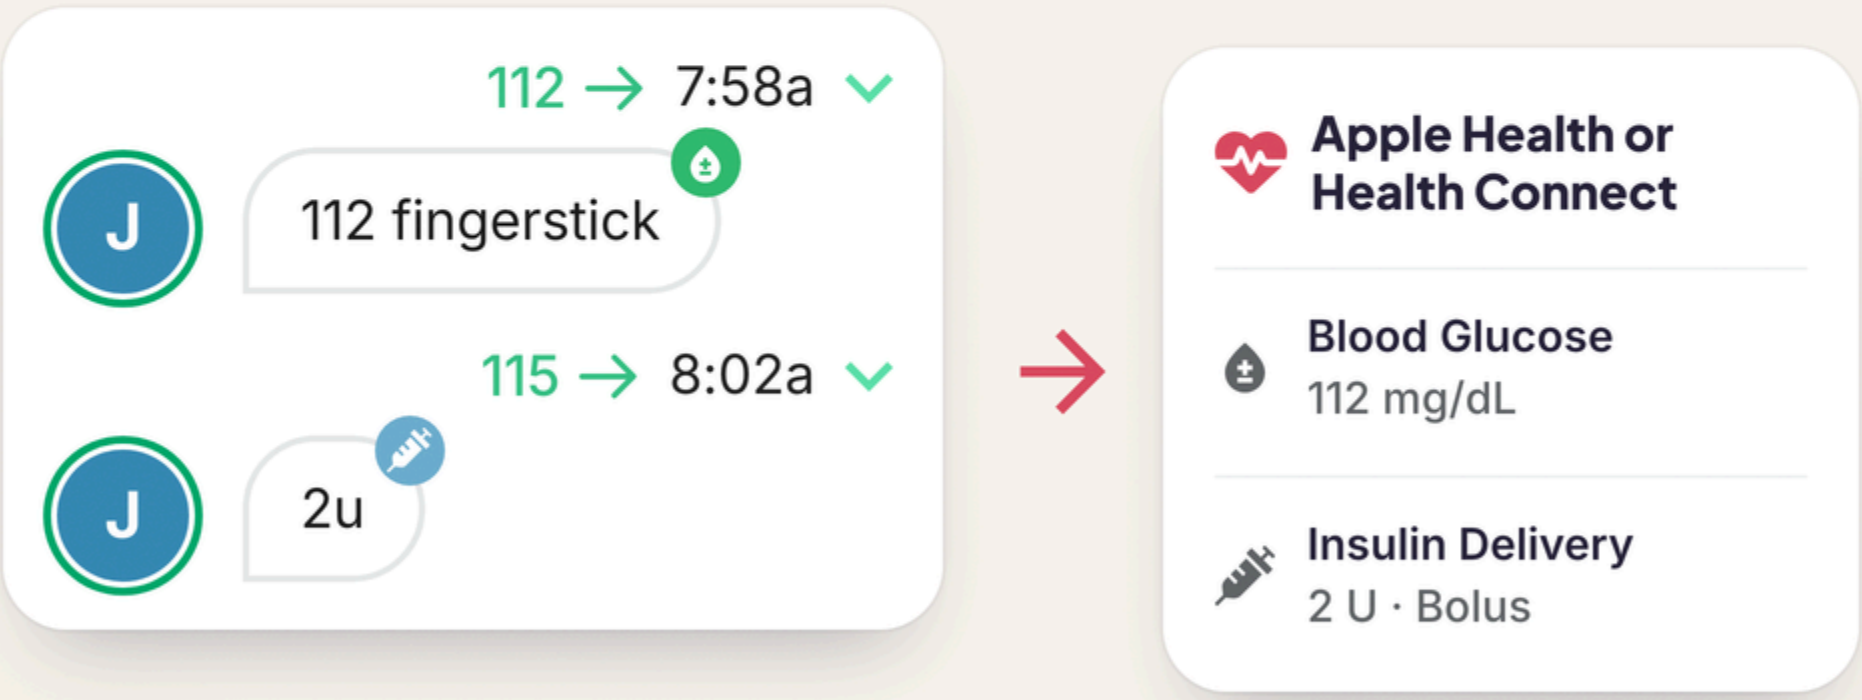

SWIPE

HEALTH APPS

NEW

Fingersticks and insulin, in Health.

Gluroo can save the fingersticks and insulin doses you log to Apple Health or Health Connect.

Turn on in Settings › Connections, on the phone of the person with diabetes. Insulin: iPhone only. Example readings. Not affiliated with Apple or Google.
